

Data Engineer

Job Description

Purpose	The purpose of this role is to specify, develop and recommend high quality data and technology solutions for internal and external use
Responsible to	Head of Data and Business Technology
Direct reports	None
Internal relationships	The Data Engineer will work closely with Product Managers, Data and Business Technology team members and all staff at ICNARC.
External relationships	To represent ICNARC when dealing with enquiries from relevant individuals, bodies or groups; and to represent ICNARC at meetings and conferences, when required.
Location/Environment	Napier House, High Holborn / Flexible Working / Remote Working

Principal duties and responsibilities

- The provision of knowledgeable advice on the specification of high-quality database creation for applications for internal and external use.
- Development of applications to a very high standard using the latest technologies, including: adherence to best practice standards; and ensuring that the applications are robust and flexible enough to cope with changing needs.
- Ongoing support and enhancements for applications.
- To develop within the Agile Project Delivery framework; Agile Dynamic Systems Development Method (DSDM).
- The production of high-quality software-related documents based within the Agile DSDM Framework using Confluence and Jira: user requirements analysis; functional specifications; technical documentation and supporting/advising the writing of user manuals by “super-users”.
- The provision of technical advice, consultancy and training for ICNARC staff, as required.
- Provide guidance on IT infrastructure changes.

General duties and responsibilities as an employee

- To work as part of a team and contribute to the overall aims and objectives of the organisation
- To be an advocate for the organisation
- Attend staff meetings and training as required
- All staff are required to operate in accordance with ICNARC's values, policies and procedures, including but not limited to, Health and Safety, and Data Protection

The above list of duties and responsibilities is not exhaustive, and you may be required to undertake other responsibilities and training as requested and as appropriate to your role level.

CHANGES:

This is a description of the job as it is presently constituted. It is the practice of the ICNARC to examine job descriptions from time to time and to update them to ensure they relate to the job as then being performed, or to incorporate whatever changes are being proposed. This will be conducted in consultation with you.

This job description is supported by annual objectives and performance standards to provide an indication of the level of performance expected from the role.

Requirements	Essential	Desirable
